## Core Bus Network Development

As part of the development of the Core Bus Network in Cardiff, we are proposing to deliver a series of bus priority improvements to the Western Bus Corridor. These improvements will reduce journey times and increase the reliability of bus services to the city centre.

Improvements along the Western Bus Corridor are being delivered in phases, subject to the availability of funding and the feedback we receive.

The next phase of the works is to deliver an inbound bus lane on Cowbridge Road West on the approach to Ely Roundabout (towards the city centre).

In conjunction with this work to improve active travel we are also proposing to upgrade 2 x pedestrian crossings to toucan crossings and minor amendments to the footway on the western side of Cowbridge Road East to allow for shared use. This is part of Route 6 of Enfys, Cardiff's cycle network and will also improve the links to the Ely Trail.

If you have any comments on this scheme please get in touch before 20th September 2012.
